Diagnostic Data Printout

Entering the "SYSTEM" Menu provides you with access to many diagnostic features. Among these features is the "Diagnostic Data Printout." Selecting this option will provide a printed label with information, such as, Main ROM number, RAM capacity, Calibration setting, Thermal head resistance, Label sensor data, Maintenance count of label FEED, PRINT and COUNT along with all initial settings of the scale. All this information without taking the scale apart.

Management Reports

Management reporting of sales and sales activity is available locally at the individual scale. Reporting is available in the following formats:

- PLU group or individual item
- Entire PLU file
- Combination Reports as selected
- Production Reports
- Department Totals
- Grand Total Reporting

Options

- Data Load and Save Device, Model PL-3
