# DSW-100 Calibration Manual

1. Power on.
2. Press the CAL switch to start calibration. (*Note: CAL Switch is located underneath of the body.) The display will show "SP on."

3. While holding the ZÉRO button, hit UNIT TARE TARE to enter the calibration mode. The display will show the default calibration weight.
4. Press the ZÉRO button to enter zero calibration. (*Note: The platform should be empty.)

5. Press the ZÉRO button, and then the display will show "CAL SP."

6. Place the calibration weight and press the ZÉRO button.
7. It will return to the main interface.
