WHY A TRAILER SCALE?

The 8' x 15' deck is the workhorse size for ranches running mid-sized groups, sale-barn loads, or sheep and goat operations. Pull it to the chute, drop the gates, drive the cattle on, and capture an NTEP weight. No concrete, no foundation, no pit. Built by USA Measurements for the realities of livestock weighing.

USA MEASUREMENTS US-CT60-8X15-15K, FEATURES & SPECIFICATIONS
